

Project Description

BR-0000-00(679), Chattooga County, PI #0000679

CR 322/Old Highway 337 Bridge Replacement over Chelsea Creek

The proposed project would consist of the replacement of a narrow and structurally deficient bridge located on CR 322/Old Highway 337 over Chelsea Creek approximately 3.20 miles northeast of the City of Menlo, Georgia. In addition, the project would also widen CR 322/Old Highway 337 approaching the bridge from both directions. The existing typical section consists of two 9' travel lanes with 4' rural shoulders on 60' of right-of-way. The existing bridge structure is 40' x 20.3'. The proposed typical section would consist of two 12' travel lanes with 4' rural shoulders on approximately 160' of right-of-way in most places along the project corridor, with a small section of 180' on the south side of Chelsea Creek between Stations 28+22.65 and 29+38.09. The proposed bridge structure would be 80' x 28'. Total project length would be approximately 0.23 mile. The roadway within the project corridor would be closed during construction. Chattooga County will be responsible for the signing and maintenance of detour routes around Agnew and Hair Lake roadways.
