

DEPARTMENT OF TRANSPORTATION

STATE OF GEORGIA

INTERDEPARTMENTAL CORRESPONDENCE

FILE PI#0011682  
Dade County

OFFICE Design Policy and Support

DATE September 25, 2013

JGF/RJC

FROM Jeffrey G. Fletcher, Location Bureau Chief

TO Darryl D. VanMeter, P.E., State Innovative Program Delivery Engineer

ATTENTION Andrew Hoenig, P.E.

**SUBJECT: CONSULTANT DATABASE RECHECK**

A recheck of the existing pavement portion of the mapping database was completed using an error tolerance of 0.1 ft. Sixty three (63) pavement shots were taken. Eleven percent (11%) of the pavement shots checked were out of tolerance. **In my opinion, the existing pavement portion of the mapping database checked, now meets the Department's accuracy standards.** Attached is a surface check report for your use.

The approved files are located in: Pccommon\Statewide Location Bureau Approved Files\0011682\Approved Files Folder

Any quality checks performed by the Department are done so as a partial check of the project and the check shots are taken at random locations throughout the project corridor. Under no circumstances does a QC/QA review by GDOT release the Consultant from their contractual responsibilities involving QC/QA or from their professional liabilities involving the survey and engineering work for the project. Nor does it preclude them from recovery of damages during construction that results from errors and omissions in the plans.

If you have any questions, please call Bob Cagle @ 404.699.4449.
