

STREAM BUFFER ENCROACHMENT

Stream Buffers are not impacted by this project.

The Contractor is not authorized to enter in to stream buffers, except as described in the table below:

STREAM NAME OR NUMBER	LOCATION OF BUFFERED STREAMS AND STATE WATERS **			STREAM TYPE (WARM OR COLD WATER)	BUFFER IMPACTED (YES OR NO)	BUFFER VARIANCE REQUIRED?	DESCRIBE THE ALLOWABLE ACTIVITES AND/OR RESTRICTIONS WITHIN THE BUFFER AND APPROXIMATE LOCATION OF IMPACTS.
	ALIGNMENT	BEGIN STATION (LEFT OR RIGHT)	END STATION (LEFT OR RIGHT)				
Stream 37	I-75	1055+23.0	1055+23.0	Warm	No	No	This watercourse is a designated state water and I-75 crosses the buffer perpendicularly. Construction activities should be limited to the construction of roadside ditches leading up to the stream buffer.
Stream 39	I-75	1108+00.0	1108+00.0	Warm	No	No	This watercourse is a desingated state water and I-75 crosses the buffer perpendicularly. Construction activities should be limited to the construction of roadway limits.
Stream 40	I-75	1164+61.0	1164+61.0	Warm	No	No	This watercourse is a desingated state water and I-75 crosses the buffer perpendicularly. Construction activities should be limited to the construction of roadway limits.
Stream 41	I-75	1178+20.0	1178+20.0	Warm	No	No	This watercourse is a desingated state water and I-75 crosses the buffer perpendicularly. Construction activities should be limited to the construction of roadway limits.
Stream 42	I-75	1187+15.0	1187+15.0	Warm	No	No	This watercourse is a desingated state water and I-75 crosses the buffer perpendicularly. Construction activities should be limited to the construction of roadway limits.

* Warm water streams have a 25-foot minimum buffer as measured from the wrested vegetation. Cold Water streams have a 50-foot buffer as measured from the wrested vegetation.
 ** Locations are approximate, a detailed location of stream buffers and authorized work areas are shown on the individual BMP sheets.
