Policies & Procedures

Policy: 4465-5- Streamline Traverse Surveys

Section: Surveys

Office/Department: Office of Design Policy & Support

Reports To: Division of Engineering

Contact: 404-631-1000

The following procedures are to be implemented on all location projects:

Streamline Survey Procedures for Flowing Streams

The District Survey Crew (DSC) will, during the course of the location survey, perform a stream traverse of all flowing streams crossed by the proposed project.

The stream traverse should extend a minimum of 300 feet on each side of the project centerline and should establish the centerline of stream and profile of the stream bed. The DSC will also establish a benchmark at each flowing stream.

This information is required in order to design the drainage structures.

Questions concerning these requirements are to be directed to the Statewide Location Bureau at 404-699-4401.
