Policy: 6120-9- Reporting of Change in Vertical Clearance

Section: Bridges - Maintenance

Office/Department: Office of Bridge Design

Reports To: Division of Engineering

Contact: 404-631-1000

The Maintenance Office has the responsibility of providing the Office of Permits and Enforcement with the height limitation of structures. For this reason, it is of extreme importance for this office to be kept informed of any change in vertical clearance as soon as possible after the change occurs.

In order to achieve the above, we request that personnel directly involved with vertical clearance revisions at any structure on a state route notify the Maintenance Office immediately.

This report may be made by telephone to the routing engineer at 404/631-1387 or to the Asst. State Maintenance Engineer, Bridges. The Maintenance Office will handle the reporting of the above changes to the Office of Permits and Enforcement.
